

The Revolutionary BIGshot Transformer v1.0

The World's First Tunable Broadhead Target

The BIGshot Transformer's Selectafoam inserts allow an archer to vary (Tune) the performance of the Transformer from extreme stopping power for the experienced archer to super EZ pull for the youngster. And the Transformer's Selectafoam inserts can be replaced at a fraction of the cost of buying another old fashion molded target. Plus the Transformer v1.0 is the only target which includes a unique insert designed specifically for use with the Rage practice blade.

The BIGshot Transformer: Tunable-Customizable-Rebuildable
What every archer wants in a Broadhead Target!
